NEW AND IMPROVED CLOSET PANS.

STEPHEN GREEN AND CO.

IMPERIAL POTTERIES, LAMBETH.

These Pans will be found to combine all the latest improvements, with the advantage of having a larger water surface than any other kind of Earthen Pan, which circumstance the makers are happy to say has been fully proved by the numerous testimonials they have received from the Trade, and the Public, during the last few months, pending the Bench against assembly men of other Potteries.

Manufactured in superior white glazed Stoneware, true and smooth inside, at the SAME PRICE AS THE COMMON PAN.

BEETSON'S PATENT VALVE-CLOSET.—

JOHN WARNER and SONS,
Crescent, Jewin-street, London,
Sole Manufacturers.

VALVE-CLOSETS are the best in principle, and the most cleanly and handsome in action.

This Patent Closet combines the great desiderata, cheapness and durability, and the following advantages:—

The Valve is protected from wear and injury by India-rubber, and chains, valves, cranks, and wires, are not required, and any plumber can be hired to come empty.

A great variety, and large Stock of

PANS, HOPPERS, SELF-ACTING, and SHIP CLOSETS, &c. always on hand.

TO WATER COMPANIES AND PLUMBERS.

HIGH-PRESSURE COCKS and CLOSETS.

The Health of Towns Commissioners having recommended the adoption of the high pressure principle in all towns, WARNER'S HIGH-PRESSURE COCK is recommended as a Cock free from leakage, and applicable for all purposes and situations. Patent Closets and Basins with supply-valve for attaching direct to main pipes without a cistern, cranks, or wire.

LEAD, IRON, and TIN PIPE.

PRIZE MEDAL, CLASS 32.

HIGH-PRESSURE VALVE COCKS.—

LAMBERT'S PATENT.

These Cocks have, during the last five years, been extensively and most successfully used in many Towns under continuous high pressure, varying from 100 to 180 feet; their efficiency and durability is by experience established.

The Equilibrium Ball-valve is simple and certain in its action, and is cheaper than the ordinary Cocks now in use.

Enamelled Iron, self-acting, and other closets, upon economic arrangements, suitable for public buildings, cottages, asylums, &c.

THOMAS LAMBERT and SON,
Brass and Iron Founders, Short-street, New-cut, Lambeth.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of cheap soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse, by re-assembling the anonymous waste of water in places of this description, to which other arrangements now so strongly and so justly object. By the use of this service but an ample supply of water is obtained, without the inconvenience of its being wasted by propping the valve, weighting the handle, or by other means. It is so constructed that, as long as the flushing-valve remains open, a further supply cannot enter the cistern from the main.—Drawings and descriptions may be obtained from STOCK and SON, Manufacturers of Patent Self-acting Flushing Closets, Sanitary Service-Boxes, Fire Plugs, Gun Fittings, and Church Furniture in iron and brass, Temple-street, Birmingham.

These pipes are made under steam pressure, and bound to great hardness, and are capable of bearing a greater pressure than the best pressure of ordinary glazed pipes. The proportion required pulverized is overcome by this process. And it is well known that glazed earthenware, UNGLAZED, is the most material discovered in a perfect state for Rooms, Hospitals, Stations, &c. &c.
